## WATER JET

*NE Seal offers a variety of water jet services. Water jets excel at cutting more precise than plasma cutting, down to just 0.002" tolerance, and is ideal for temperature-sensitive materials.*

*Water jet precision also cuts down on material costs.*

*Cut right from CAD files, blueprints, samples, or sketches on materials ranging from neoprene, to wood, to steel, and more!*

*NE SEAL prides itself on fast, efficient service and high quality products. Our fully capable sales and technical staff are on hand to provide you with solutions to your needs and make recommendations where required.*
